# Principal's Message

**"As long as our ideas are expressed and thoughts kindled we can be sure of learning, as everything begins with an idea."**

**My dear Parents, Teachers and Students, I was always attached to the thought Home is the first school and School is the second home. In fact, today it has come true. COVID 19 has altered our life including our school system, teachers, children and parents. Our homes have become school and parents have become teachers too. Unimaginable! Invariably it is happening. It's a fact we have to live with it now whether we are rich or poor, far or near. E- learning has emerged as the best way of imparting education.**

**It gives me a great joy to meet you all though this e-magazine a great way to communicate and be creative. Enjoy our magazine as we move on with our lives. I thank all who contributed to this endeavor.**

**Be assured that the Management, teaching and non-teaching faculty of the school is working towards making this lockdown a meaningful and fruitful one. We will leave no stone unturned in educating our Kilbil family.**

**I remain grateful to all the parents and well- wishers for your priceless support and cooperation at this moment. My sincere advice to all the students - Do not lose HOPE. Concentrate on the Silver lining amidst the thickest and darkest cloud at present times. We, at Kilbil St. Joseph's school, hope to see you all soon - refreshed and rejuvenated. Till then**

**"SPARK A LIGHT - ILLUMINATE THE WORLD."**

**Sr. Flora UMI  
Principal**

## MESSAGE FROM THE MANAGER'S

Dear Parents, Teachers and students, "Good habits Shape your future". I am reminded of a little piece of wisdom from the life of Felice Leonardo "Leo Buscaglia" known as "Dr. Love". There was a strange system in his family. At the end of each day, after everybody sat around the dining table, the father would ask each one, what they had learnt from the day. So each one had to share something that they had learnt on that day and only then they could eat.

So in case anyone of them in the family said, "No, today I learnt nothing", it seems the father used to say, "Let everything remain on the table, come let's go and open the encyclopaedia. Let's learn something and come back to the table and only then we shall eat." Leo used to think that he was a cursed child of a bad father who did not allow him to enjoy his dinner and rather demanded that he would have to tell him what he learnt on that day.

As life moved on, Leo became a motivational speaker and a professor in the department of Special Education at the University of Southern California. Today, when he listens to the standing ovation of lakhs of people for his excellent performance, he says, "But one thing has not changed; when I brush my teeth, and I come to the bed and lie down, I can still hear Papa ask me, 'Felice, what have you learnt for the day?'" All great people have a history of discipline and good habits. Yes, good habits shape your future.

Keep learning something every moment. As infants, we're presented with a strange new world to discover. And with nothing else to do, we dive in head first, devoting all our time to learning how to use our five senses. At first we appear completely hopeless, not even realizing that our arms and legs are parts of our body. But soon enough, we start figuring some things out. Within a few months, we learn how to recognize faces better than a computer can. COVID 19 too taught us new learning. Right now, we see ourselves collectively facing this pandemic, a situation for which we had no experience and very little preparation. And, at this time when the whole world is battling against it, Kilbil St. Joseph has added another feather to its cap; the E-Magazine, to provide a platform to our students to bring out their creative thoughts and expressions.

My hearty congratulations and appreciations to the Principal and the teachers for their untiring effort in moulding the young minds and bringing Kilbil St. Joseph to its zenith. I also extend my heartfelt gratitude to all the parents for their continued support to our Institution and its endeavours. Dear parents, you have, indeed, walked an extra mile to ensure that your children make the best use of their time. I pray that you and your children would enjoy the journey as you sail through this enchanted ocean of brilliance. I wish you all a happy and grace-filled day ahead.

"MAY GOD ALMIGHTY KEEP US SAFE AND HEALTHY."

Sr. Alice Antony  
Manager

## CO-ORDINATOR OF TINY TOTS SPEAKS...

***It gives me great pleasure and pride to release the very first Brigida Kindergartens E-magazine - a great way to communicate and be innovative. Enjoy the creative expressions of the budding minds as we move on with our lives.***

***Home is the first school and School is the second home. This fact has come true, as Corona virus pandemic has altered the pace and nature of the human life journey including our school system, teachers, children and parents. We have encountered much disruption to the normal flow of life. As we navigate through challenging times toward a better future, the management and staff have put priceless efforts to make this lockdown a meaningful and fruitful one by posting videos and conducting online interactive sessions. Our prime task is to carve the minds of children into beautiful living sculptures of love, compassion, respect and kindness; these are the very qualities that are shared in Brigida Kindergarten through various online activities. Quality education based on the basic values of life forms the foundation of our curriculum where children learn a lot through observation and activities. Special focus is given in nurturing good manners, etiquettes and also in developing social skills.***

***A bouquet of gratitude to Sr. Flora Borges UMI, the Principal for her excellent work of guidance and enormous support .I congratulate our Pre-primary teachers and sincerely appreciate their efforts in bringing out the maiden E- magazine. A very big Thanks to the parents and students who have contributed their mite towards this venture.***

***May God's blessings be always upon us and all our endeavours.***

**Sr.Sucorin Rebello UMI**

# The Resilience of Kilbil

Every Academic year is closed with great contentment and satisfaction of having achieved all what we have planned and aimed at. But alas! the academic year 2019-2020 came to an abrupt and inconclusive grinding halt on the 16th of March 2020. The reason a tiny Corona Virus originated in Wuhan China was transported to the entire world and finally came to pitch its tent even in our beloved country India.

Though all of us were hearing a lot about this pandemic and the havoc it makes in various parts of the globe, we were rather comfortable thinking that it is oceans away and we are perhaps immune to it. But it caught us almost unaware when various states of our nation began shutting down. Finally, all educational institutions were asked to shut down indefinitely by mid March. The nation went in to an unprecedented complete lock down for 21 days, 19 days, 20 days, etc and then the onus was passed on to each state and thereafter each district, panchayat, locality, etc. The nation began to open up little by little, sector by sector from August 2020.

When the country went into a total lock down, we at Kilbil began to look for new vistas under the dynamic leadership of our principal Sr. Floropia to keep connected with our students, teachers and parents. Not even an iota of helplessness experienced at our end. Right away held the bull by its horns to harness and master the online literacy! As the usual 10th standard classes were on before the closure of the academic year and before the commencement of the new academic year the teachers had the opportunity to experiment their online efficiency right away and gain confidence.

Almost throughout the summer vacation the management together with the staff was engaged in some or other form of online training and equipping themselves to grab the online opportunity as soon as the school reopens. Having girded with our loins, we did not shy away to reopen the school in the mid-June. Even after the reopening we continued with our online literacy from time to time, to update ourselves to fulfill the various exigencies of online teaching. My honest appreciation to the older folk to which I too am a part as we never kept ourselves aloof from this new challenge.

Nothing was missed out with the exception of the physical presence of one another. The vacuum created by a condition like this was too deep and too wide to be filled in. Months on end we had not met each other. The children pined and the parents and the teachers groaned! An year long ordeal of a tiny Virus! The eager impatient long wait to see some gleaming light on the other end of the tunnel! Children of Kilbil from the tiny tots to the teenagers, you indeed are the buds and blossoms of Kilbil! We lack words to express how much you mean to us and how much we miss you! Your laughter and chatter! Your dashing and falling!

Your bruising and yelling! Your romping and bumping! Your cheating and beating! Your fights and rights! Your complaints and witnesses! Your blames and claims! Your pulls and pushes! Your innocence and excesses! Your samples and examples! Your wonder and blunder! Your enquiries and discoveries! Your love and sacrifice! Your sharing and caring! Your smiles and hails! Your respect and reverence! Your ideas and innovations! Your originalities and creativities! Your highs and byes! were all missed out at Kilbil in this academic year!

In spite of all these we are together virtually. We meet you regularly though not all of us. We do communicate with you from time to time. Time being we need to be content with it and try to make the best out of it.

Though we are on difficulties every side not crushed as the human spirit is much larger than all the problems around us. Let us be optimistic enough to tide over even the pandemic COVID-19 with the human and divine help. Keep the spirit high we are almost through the tunnel!

***Sr. Alinda Jose UMI***

# "AN ARTICLE OF LOVE"

To you probably hear the word "LOVE" many times each week, you may hear it from a parent, in your place of worship, on TV or in a book. You may even say the word love a lot yourself! You may use the word love about a song, a food or your family pet. You may tell family members you love them. As you can see, there are many kinds of love! But not all kinds of love are created equal. So what does love mean to you? And what kind of love is most important? Love gives life meaning and purpose. As Mahatma Gandhi once said, "Where there is love there is life." In the dictionary, love is defined as a strong, positive feeling you have for someone or something,. But it is also a lot more than that. People show their love not just with what they say or feel, but by what they do. At its core, love is about being kind and doing good things for others. A famous verse from the Bible describes how love is more than just a feeling, but the way you act and treat others. "Love is patient, love is kind. It does not envy, it does not boast, it is not proud. It does not dishonor others, it is not self-seeking, it is not easily angered, and it keeps no record of wrong. Love does not delight in evil but rejoices with the truth. It always protects, always trusts, always hopes, and always perseveres." Before we can show love though, we must first love ourselves. This allows us to love others no matter what. Showing love allows us to put the needs of others before our own. So what are some ways that you could show love? It could be as simple as volunteering at a local soup kitchen. Maybe telling those we love how important they are! Consistently showing love will build a habit and fulfill your aspirations as well. The collection of great quotes for kids about love below shows the importance of love in our lives. Follow the wisdom below, practice showing love and you will find you on your way to becoming the best version of yourself! "Love looks not with eyes, but with the mind." William Shakespeare. "The art of love is largely the art of persistence." -Albert Elis. Have decided to stick with love. Hate is too great a burden to bear." - Martin Luther King, Jr. "The love we give away is the only love we keep." - Elbert Hubbard. "The more one judges, the less one loves." Honor de Balzac. "Love is space and time measure by the heart." Marcel Proust. "I could never love where I could not respect." Charlotte Elizabeth . "We are most alive when we're in love." John Updike "There is only one happiness in this life, to love and be loved. George Sand Love is important for many reasons. Do you remember a time when you loved a toy and maybe it was lost? How did that make you feel? Are there moments when you felt you needed to be loved? Love means different things to people all over the world.

**HETANSH AJAY IYER**

**LKG - A**

# HOPE

My husband and I try to be international parents. We raise our kids in way that reflects our values and matches the hopes and dreams we have for our children future.

As parents there are so many hopes and dreams we have that affect the way we raise our kids.

I hope my kid's are kind.

I hope they have a close relationship with each other.

When kids are younger , they don't always get along, but that tends to change the older they get. I hope my kids will have a healthy bond that lasts a lifetime.

I dream they will enjoy life.

Life can be so stressful and overwhelming as you get older. One way to be international with your kids is to play with them and to show them that fun is part of a healthy balanced life. Hopefully they will follow in your footsteps.

I hope they understand why we parented the way we did.

As kids, they will not always get why we decide on what we do. I hope they will get it as they get older and know that our hearts were always to help and not harm. Protecting them and setting boundaries is an area that kids cannot always see the bigger picture in the moment.

I dream they will be happy.

There are many stressors in life that derail our happiness. I pray that we have instilled in them the truth about what happy really is.

I hope they never stop learning.

We never arrive. Life is always twisting a turning with a new angle to look at. I hope they have joy in the journey as they discover what is around each corner.

So overall my wants, my wishes, my dreams, my hopes, and ambitions of my kids are that they are happy. Simply happy

Devdatta Swapnil Shinde  
LKG- A

# HOPE

Hope is the essence of life. Many of us could not even live a life of peace without having hope, deep inside the heart. Life is unpredictable, hard and quite notorious. It is true that we become men and women because of mighty hopes. Hope is the greatest happiness of man, however much he may suffer. But those who are without hope it makes life worthless. Hope not only gives you the strength to overcome a pain but it also makes journey for the future easier. Let's not worry about the fact that today is bad. Hope keeps us telling that tomorrow will be better than this. Hope is a part of everyone's life. Every one hopes for something. In other words "Always Hoping for the Best". Merriam Webster's definition makes "Hope" seems close to "wish" to "cherish a desire with anticipation to want something to happen or be true". Hope is not the same as optimism. An optimist generally is more hopeful than others. On the other hand, the pessimist person you ever met can still be hope feel about something. Such as "I Hope I get that job I am interviewed for, I hope she calls me" or for a little kid during the holidays I hope I get that bike I wanted. An example of that is reported by the American Psychology association Children who grew up in poverty but had success later in life all had one thing common- "Hope"- De Valerie manholes who worked on the research, said Hope involves planning and motivation and determination to get what is hoped for. To conclude, it's not bad to hope if you hope wisely. As already indicated, when your hopes are false you can end up feeling not simply frustrated and disappointed but also angry and resentful and possibly embittered.

Shaurya Mayur Tambat L.K.G A

# *LOVE*

Love has many meanings. It can mean being affectionate towards a person, and the affection reciprocated. Love is a set of emotions that we experience. Love could also mean beliefs or behaviors that show your affection towards someone. Love is a feeling that everybody yearns. It makes them feel happy and vital.

Love can be for many things, family, partners, pets, nature, and even for oneself. Honesty, care, and trust accompany love. As humans, we depend on one another, and though we may be different, love binds us all together and make the world a much better place.

Love is the many emotions that we experienced when affection and care was shown to us. It is not just romance. Love can mean many things and can vary from person to person. Honesty, care, and trust constitute love. Everyone wants to be loved. It gives them happiness and makes them feel like they matter. We love many things, and the love we think varies throughout our lives.

Our first experience of love is at birth. The bond that we form with our parents is one of the purest. Parents love us from the moment we are born, and this love only grows stronger. They care for us and help us to improve. A child always needs the warmth and love of their parents. As we grow older, we learn to become more independent and do not need our parents as much. However, they are always there when we need them, and they will ever love us. As they grow older, they need our help and attention. Moving on with our lives and forgetting about them affects them, and they feel lonely. We need to be there for them the same way they were with us.

*Rudra Amol Avhad*

*LKG-A*

*Students are said to be the future of the country. For this they just need the proper support. Now you must be thinking that what type of guidance they need? So the first one is inculcating values and good habits in them though they feel hurt the parents you should not stop. Also in addition to instilling the flexibility to readily adapt to changing technologies, teachers must foster learning environments that encourage critical thinking, creativity, problem solving, communication, collaboration, and social responsibility. Lastly I would like to say that support them till it's needed but as they grow let them do their work on their own and let them know the struggle to survive in the world and you just be there to help them if they need.*

**BY: TR. PRIYA.**

# HOPE

The SARS-COV-2 pandemic has created a global health crisis that has a deep impact on the way we perceive our world and our everyday lives-On Jan 30; 2020, the WHO declared the covid-19 (SARS-COV-2) outbreak a global health emergency and on March-11:2020 as a global pandemic.SARS has spread to 216 countries around the world causing hundreds of thousands of deaths. A worldwide virus attack has shut down cities, big and small and even entire countries. The pandemic has restricted travel, quarantined the citizens, cancelled long gatherings and educational institutions were closed. Covid-19 has the potential to create devastating social, economic and political crises that will leave deep scars. Everyday people are losing jobs and income with no way of knowing normally will return. Wearing masks and social distancing help your chance of being exposed to the virus or spreading it to others, but these measures are not enough. Vaccines will work with our immune system, so, it will be ready to fight the virus if you are exposed. "Life will not get back to normal immediately." Said Dr. Simone Wildes , infectious disease doctor at South Shore Health, but in the coming months. "The vaccine will be a main part of getting us back to normalcy," She said. We need to give people information so they can be aware of what to anticipate. Educating everyone on what to expect will help to avoid false alarms. Though the travel and tourism sector is impacted by the impact of the Covid-19 pandemic, it will thrive again in the post-vaccine era. Crises is an opportunity to change and come up with innovation, so that revival is faster. Technology can help, we have to accelerate digital skills training for the youth ,that will help us revive the business. Full recovery may take 2 to 3 years. School and Colleges are closed during the pandemic. It had clear negative impacts on child health, education and development, family income and the overall economy. But after vaccination we can expect everything may come to normalcy. It will help in social and psychological well-being. If we choose to open schools and colleges, once the curve stabilises, there are very strong chances that we will be able to achieve herd immunity. Re-opening of school will help in emotional well-being of the children. Schools can be re-opened by following all SOPS. So, let's give the students the pleasure of enjoying the hustle and bustle of school life now.

## Online class & videos

Many Sectors of Indian Economy suffer a heavy loss due to the COVID- 19 pandemic. Life has come to a stand still. Education sector incurs loss in the cost of students' academic year. But the **Brigida Kindergarten** has firmly decided that learning must go on. Education should not be disturbed at any cost. Therefore the concept of online classes was introduced by the **Brigida Kindergarten School** which is really very helpful to impart the knowledge to the pupils by their lovely and hardworking teachers with the help of internet and computer/ laptop/ Smartphone. So the School and parents are joining their hands to make it happen more enjoyable, interesting and productive.

My Son Tanvish Jivrakh enjoys a comfortable learning environment when he is locked inside the home during this pandemic. He can interact with his teacher and have a lot of fun in Online Classes. He can learn at his own pace, have his individualised schedule with the help of his enthusiastic teachers. He likes videos of rhymes and animated Videos. In this academic year through the online classes he learnt Cursive Letters A to Z and Numbers 1 to 30. He also completed worksheet and homework regularly. Sometimes he is getting bored while writing tasks but he enjoys G.K., Arts and Craft and Phonics activity. He is overjoyed to participate in many competitions which were held on the occasion of 15<sup>th</sup> August, Diwali and Christmas. The only one worry that I would like to share that, we are letting the young Kids sit in front of Computers and Smartphones for a longer time. But on the background of in the COVID-19 pandemic situation as a parent I certainly welcome and appreciate the efforts of **Brigida Kindergarten School**. Afterall it is the most important hub for our little ones for their academic progress.

Tanvish Jivrakh  
LKG- A

# LOVE GOD

We love what? We love those who care for us, who thinks of us, who always support us, who always encourage us. They play vital role in our life and we love them the most .They are my parents at home and my teachers in school.

God can't reach everywhere so he created teachers when I am in school and parents when I am at home so I am always with god. They motivate me, care for me, nurture me, teach me so I could be successful and become a good human being.

For blackboard chalk is important, for trees leaves are important ,for books pen is important for us parents and teachers are important in our life.parents are teachers at home and teachers are parents at school.

Both love us they will always be more happy than us when we are happy.

During the Covid crises we were not ready. Parents were with us but we missed our teachers the most. They were always with us to help. They are God's gift for us .Teachers who love teaching the children to love learning.

We love them and thank them for being with us always and thank god for being with us.

AARUSH KADBHANE

LKG -A

## **Online Classes And Videos**

First of all, I wish to Congratulate the entire team of Kilbil school for their consistent efforts to ensure the continued learning of our children. I am sure the journey has been far tougher for you all to adapt to this new way of teaching and we parents have observed the additional effort everyone has put in. I have been watching them from last many months during the online classes. The teacher have immense patience to handle the class. There are some naughty students in the class but the teachers maintain calm and handle the class very effectively. I hope this message is clear to the students so that it brings the desired fruits during these tough pandemic days. It's truly a new adventure for both teachers and students it also enables to maintain social distance. Teachers are the superhero for students especially the little ones. During online session each and every student speak and express themselves. The teacher also gives good feedback to the students. I am thankful to all the teachers of Kilbil.

**Lavanya S. Barve**

**LKG- A**

# Tree Plantation

Today we know that the whole world is on the path of development and to make our own country economically stronger. In each and every field of our country is on the way of progress. But don't you think that in the way we are progressing we are getting lots of help from our Mother Earth and its beauty which is the Nature around us? As the nature has fulfilled our needs it's our responsibility to regenerate and enhance it.

Nature's contents are water, clouds, mountains, soil and trees. Tree covers 30% of the nature. These trees are most important part of our life. Our daily basic needs are met by trees which help us in breathing, providing food, clothing etc. Trees give us oxygen which is most important for all the human being on this planet. We cannot survive a single minute without oxygen. Trees largely help for the rainfall.

Considering the importance of trees Brigida Kindergarten the pre-primary section of Kilbil St. Joseph's High School celebrated the occasion of Environmental Day our tiny tots planted seedlings and plants with the support of their parents. The aim of this activity was to inculcate love for the nature by planting trees. This activity was done online and in a simple manner. The little ones have planted a sapling each at their home. After doing this task they sent a photo of it to their class teacher through mail. This activity was also done to make the children know that how important trees are for us and also planting and caring for them is a very good habit. These trees are going to supply oxygen to whole surroundings. Through this activity they learn that even small children can do something to protect and enhance the nature around them and thus continue this good work with the motto **"SPARK A LIGHT ILLUMINATE"**

# TREE PLANTATION

# ***HOMEWORK, I LOVE YOU***

HOMEWORK, I love you, I think that you are great,

It's wonderful fun when you keep me up late.

I think you're the best when I am totally stressed,

Preparing and cramming all night for a test,

HOMEWORK, I love you, what more can I say?

I love to do hundreds of problems each day.

You boggle my mind and you make me go blind,

But still I am ecstatic that you were assigned.

HOMEWORK, I love you, I tell you It's true,

There's nothing more fun or exciting to do.

You are never a chore for it's you I adore,

I wish that our TEACHER would hand you out more.

HOMEWORK, I love you, you thrill me inside,

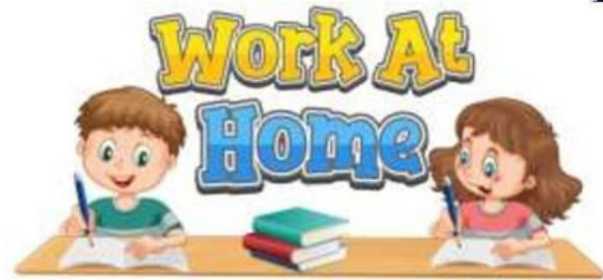

I am filled with emotions, I am fit to be tied.

I can't complain when you frazzle my brain,

Of course that's because I am completely insane.

## Heroes at Homes

All of us are struggling a lot at different levels since last 10 months due to the Covid Pandemic. All the Doctors, Police, Sanitary workers are doing their best in this Pandemic on their fields, so too the most important pillar of society the Educators. This is small trial of appreciation to all the teachers who take lots of efforts, to familiarize teaching. This is a completely new way in school education system, and most teachers struggle to adopt this mode of teaching. I would like to thank you respected principal and teachers of our school for taking this good initiative for creating and updating educational Videos, different online activities, online competitions, parents meetings. Our children are trying to their best virtually, but they are not happy. Children are badly missing their teachers, their friends and their school. Hope the situation will change soon and once again the school campus will fill with smiles and noises of these Beautiful Butterflies. Thank you so much dear Educators !

Dr. Maya Prashant Patil.

Abhiram Patil, LKG -B

## THE TEACHER'S DESK

The covid -19 has resulted the shutting of schools across the world. As a result, the education has changed dramatically, with the distinctie rise of E-learning, where by teaching is undertaken remotely and on digital platforms.

Everything in life has positive and negative aspects a goes with covid -19 situation. Difficult to decide if it's a boon or curse. If we see the positive side all the teachers have adapted to E-learning platform.

Yes we cannot deny the endless efforts taken by teachers to handle the modern technology. But we teachers never give up and got acquainted with the technology and adapted the different ways to continue teaching and learning process for the benefits of the students .Today we can surely call ourselves as smart teachers .And what we missed is the personal connection with students as it was difficult to connect to each and every child .The essence of practical school was missing .The fun and joy dealing with their small problems was missing .Even we teachers missed our school.

**Teacher , Nazmeen Pathan.**

# LOVE

Love has many meanings. Love means beliefs or behaviors or affection. Love can be for many things, family, siblings, partners, pets, nature, and for oneself. Honesty, care, and trust accompany love. As humans, we depend on one another, and though we may be different, love binds us all together and makes the world a much better place.

Love is one of the most talked about topics, from the media to our everyday lives.

When a child is born; it is the mother who easily understands the feelings or requirements of her child i.e. love of mother towards her child. Siblings reflect how they love each other, hate each other, make fun of each other, and then how they make up with each other. The special sibling bond is undeniable.

It's easy to say, "I love my family," but family love is about more than these simple words. Family love is a special type of love that comes with its unique feelings, behaviors, challenges, and rewards. Once you understand what it truly is, you can learn how to build family relationships by genuine love and care.

We've all seen the Facebook challenges and the adorable photos of the happy couples. I get tagged in posts like: "Share this post if you truly love your spouse" or "7-day Spouse Challenge". I can't even tell you how many I have ignored. This doesn't mean I don't love my Partner or that something is wrong.

Here is a story of my daughter,

One day my mother-in-law was ill, my husband and I were going out in a car, our daughter was also with us, when we got in car and started the car, My daughter asked 'where is grandma?. Grandma always come with us wherever we go, why is she not coming today?'. I say this to show a grand child's love towards grandma.

I say this to show a grand child's love towards grandma.

*"Intense love does not measure, it just gives" -- Mother Teresa*

*Parent-Hiral Tambat*

## Views on Online learning, Teachers' efforts and students' mind

**Online learning** is a great alternative to traditional method, especially for nowadays during the covid Pandemic.

Teacher's tech through online way in this year. I salute teachers who are going to school and making their best efforts. There is a lot of expenditure they are bear for online learning, making videos, uploading videos, check homework of the every students, continuously sitting in front of mobile and computer screen. This is actually very hard to handle. Even in such a situation, teachers and school administration had conducted exams very smoothly. But, I suggest it should be conducted in different time slot for 5-10 students in batch separately, for avoiding children to watch mobile screen for longer time.

And if any mistake done by teacher in online learning, parents must understand their view points, don't blame them, they are making every efforts for the learning your child. And in this Pandemic, parents are not able to send our children to school and so welcome the new method of learning. Although many people still consider traditional method as the best way to achieve knowledge and be education, online learning proves to be a great alternative. Students have the chance to study in their own time and especially at any time they are free.

It a great way to study many more topics and to boost the level of self-motivation. Online learning is so effective because students can finish their homework quickly, and there is more time left for hobbies or other activities. Online learning bring education to your home but not your friends, teachers and school playground.

At school, students learn how to make friends, be patient, get rid of disappointments, and to compete. Competition between students can be very stimulating and students will only benefit from it. Online learning cannot offer human interaction. Students are unable to pay full attention to their online class.

In conclusion, online learning should be seen as a supplement and extension of classical forms of learning. Not even the best online learning can fully replace the personal contact with a teacher, or the human relationships that develop in a group. So, traditional classes shouldn't be replaced with online learning.

## LOVE – STRONG PILLAR OF POSITIVE PARENTING

Food ,water, shelter are the basic needs for everyone to survive. Beyond all this now a days we are struggling a lot for their financial security too. Being a responsible parent we are doing our best for their present and future because they are our first priority.

**But our children also need plenty of emotional and cognitive support, quality time, nurturing and unconditional love.** Today though most of us working parents, we are trying to spend time with our family members ,but due to busy working schedule, deadlines, struggle of settlement, financial crisis we have some outbursts and most of time children are the soft targets .

**Children don't need technology to thrive, but need people to communicate, lots of experiences ,ways to express their emotions and nature to explore.**As Parents we should make it a point that we should express our love and affection for our children every day by different ways like hugging, cuddling,etc Encouragement and good night kiss matters a lot. It makes them more safe ,comfortable, warm and secure. Such feelings increases children's capacity to learn and to grow mentally and physically too.

It is observed that most parents trying to compensate their time and love in the form of costly games ,toys ,gadgets, gifts or accessories. It turns the child more and more demanding and socially detached. By maintaining age appropriate expectations of children and setting some privileges based on their behaviour we can actually help to show our children that they means a lot for us ,they are loved no matter what they are .

Most important we should keep in mind that no adult or parent is perfect, everyone has bad time now and then. We should expect and accept that we can make mistakes, it's ok! It's not a big deal. But how calmly and peacefully, skillfully we handle the situation it makes a big example for our children to learn a lot. Let's love them ,bring up them as a HAPPY CHILD.

- **Dr. MAYA PATIL. (Abhiram Patil LKg -B)**  
**COUNSELLOR ,**  
**CHILD & ADOLESCENT PSYCHOLOGIST**

## Radiating Love and Hope

Do you or someone you know radiate love? I'm not talking about a romantic love, but a vibrant love — an energy that you actually harness and radiate inward and outward to everyone and everything.

Does that sound “new age” to you? It shouldn't, because it's actually a basic human emotion. At some point of time and to certain people, without being aware of it, you radiate love more than you may realize. Ever seen a Mother with her child, particularly a newborn? The Mother often has a special glow about her when holding her child and she radiates a pure love for her baby; the baby receives that love...actually absorbs it. That's why a baby will often lock eyes with the Mother and that energy of pure love is palpable. The Mother and her child are creating a sensation of love that is so strong, it creates an energy that can actually be sensed and felt. Now, imagine if we all radiated such kind of love to everyone and everything! Wow! What a force for good and positivity that would be! Ultimately, I believe that each of us is meant to be a transmitter and receiver of love — radiating a feeling of honest love may be one of the most important things we can do as human beings.

Everyone can use some encouragement now and then. Words of wisdom that help motivate us or help put things into proper perspective are great sources of strength and hope. Use this collection of uplifting quotes to encourage and inspire you to be a happy and successful person you're meant to be.

No doubt life is a solid war zone. But it's not too bad either. Try to keep your eyes full of dreams. Hope not only gives you the strength to overcome a pain, but it also makes the journey for the future easier. Let's not worry about the fact that today is bad. Hope keeps us telling that tomorrow will be better than this. Hope is optimism. When I'm hopeful for anything, I'm thinking that sorrow and difficulty of today will soon end. Hope keeps us stay positive. As you know, our mind has lots of effects on our actions. If your mind tells you to stay strong on a path and not to lose courage, you will do so.

Again, this isn't new age stuff. This is the basic principle that one can radiate emotions, even negative ones and we can see the physical changes when we do. We've all seen how people tense up when an angry person enters the room — that's because everyone can sense that negativity. Imagine how people will respond to you if you emanate love and hope. Now imagine how much better our world would be if we all are committed to radiating love and hope — it's so basic, yet so few of us do it. Let's try to change that. To get the ball rolling, all you have to do is pledge to be a kind, loving person who will radiate love and hope to all life.

# **BRIGIDA KINDERGARTEN INDEPENDENCE'S DAY**

## **CELEBRATION**

Independence's Day is a national festival of India. India gained freedom from foreign rule. It was a historical day for our nation. for after years of struggling against the British rule India was officially free. We Indians celebrate this day annually, taking the time for remembering the heroes that helped us to gain Independence. The leaders who arose to lead the freedom movement are remembered with reverence not just in India, but all over the world.

It is the 74<sup>th</sup> Indian Independence Day this year. On this day, the Prime Minister of India host our tricolour flag at the Red Fort, He also deliver a speech to the nation as well. The national anthem is sung and flag hosting ceremonies drills, parade with members of armed force and police are conducted. However, all cultural programs and school celebrations were remain subdued due to the covid-19 pandemic.

People can shared memories of childhood days, parents can watched patriotic films with the family, specially with the kids to get a glimpse of how freedom fighters sacrificed everything to free our country .Same way to thank our freedom fighters the little toddlers celebrated Independence Day. Due to the pandemic situation this year Brigida Kindergarten also celebrated Independence Day virtually with different forms. Character Depiction Activity was conducted for the kids. They were dressed up in the different attire of freedom fighters like Mahatma Gandhi, Jawaharlal Nehru, Rani Lakshmi Bai, Subhas Chandra Bose, Chandra Shekhar Azad and the like . Children were so happy with the celebration some of them gave a small speech through videos. A big thank to dear parents for their kind support.

## Love and Hope

Love recognizes no barriers. It jumps hurdles, leaps fences, penetrates walls to arrive at its destination full of hope.

They say a person needs just three things to be truly happy in this world: someone to love, something to do, and something to hope for.

Love is a springtime plant that perfumes everything with its hope, even the ruins to which it clings.

The past is a source of knowledge, and the future is a source of hope. Love of the past implies faith in the future.

Courage is like love; it must have hope for nourishment. The hope you feel when you are in love is not necessarily for anything in particular. Love brings something inside you to life. Perhaps it is just the full dimensionality of your own capacity to feel that returns.

Love without hope will not survive, love without faith changes nothing. Love gives power to hope and faith.

Learn from yesterday, live for today, hope for tomorrow. The important thing is not to stop questioning.

Hope is important because it can make the present moment less difficult to bear. If we believe that tomorrow will be better, we can bear a hardship today.

All kids need a little help, a little hope and somebody who believes in them. Hope is the companion of power, and mother of success; for those who so hopes strongly has within him the gift of miracles.

Stay positive and happy. Work hard and don't give up hope. Be open to criticism and keep learning. Surround yourself with happy, warm and genuine people.

# Arpita More, LKG-C

## Hope & Love

When we pray with "Hope and Love" God gives us the inner strength to fight with any adverse conditions, and some of the situations we had almost given up.

To hope literally is to believe in something which is not yet realized. To love is to give respect, honor, compassion, patience and generosity of time, money, gifts etc. The greatest form of love is to devote life for others.

In the current situation of the Pandemic people realized that "Hope and Love" Only will work. The hope that God will make the world normal, which make people to love others.

Our government, Health workers, police, scientists and teachers are working to fight against Covid-19 with full devotion because they all love others. The others also have to follow the instructions given by them. And with the hope, collectively we will overcome the present situation.

Teachers take online classes to get the students ready for the next class as offline classes are not possible.

I "Hope" the world after going through this Pandemic will make people love each other with more affection than before and humanity wins.

Anshuman Sharma

## Why we love school:

School is the temple of knowledge and it is also like second home for students.

But in this pandemic period, schools are closed but their purpose of giving knowledge is not stopped. Through online class they are doing their job honestly. So, we love school.

## Hopes about school:

We hope that all the teachers of our school will do hard word to satisfy the need of parents like us.

Even when school is opened, they will take care of our children and be assured of their safety.

## Experience of school:

Online classes is the new concept, not only for children but also for the parents. But, now we used to this new concept. Our children also are familiar with it. School works hard to give knowledge to the students. Teachers are using innovative ideas. Also they are using new apps like Zoom, WebEx, Google Meet and WhatsApp for teaching purpose which is very appreciable.

- Riyansh Pawar

# BRIGIDA KINDERGARTEN

## TEACHERS DAY

### Importance of Teachers Day:

Teachers Day is one of the events for which students and teachers equally look forward to. Teachers Day is important for the students as it give them a chance to understand the efforts put in by their teachers to ensure that they get a proper education.

### Why we Celebrate Teachers Day:

Teachers Day in India is celebrated on 5<sup>th</sup> September to commemorate the birth anniversary of Dr. Sarvepalli Radhakrishnan.

**Dr. Sarvepalli Radhakrishnan.**

He was a renowned scholar, recipient of Bharat Ratna, first Vice President and second President of independent India. He was born on 5<sup>th</sup> September, 1888. Even according to our Prime Minister Narendra Modi "Teaching is not a profession, a way of life".

### How our Students of Brigida Kindergarten Celebrated Teachers Day:

The teacher's day celebration was carried out with a great joy through a zoom online meeting by the children of Brigida Kindergarten. The program was held on 5<sup>th</sup> of September, 2020 at 9:00 am online on zoom.

It started by welcoming everyone followed by the prayer by our students. Student participants were ready with their performances.

After the prayer, the speeches on teacher's day were given by the students followed by the dance performances presented to the teachers by our toddlers. Few students presented their songs on teacher's day, as a gift to their teachers, followed by the games conducted by parents of our students for the teachers. Everyone was involved in the games and enjoyed it a lot.

We organized vegetable print card making competition for our students. Children enjoyed making it using water colors and vegetables like lady fingers, onions, chilies, carrot, etc.

They kept the pandemic situation aside and showed their enthusiasm, love and affections towards their teachers in a very creative manner.

It is rightly said that teaching is not a service, profession, or job. It is a pillar of society.

## **Experience of online teaching**

First of all, I am thankful to all the teachers of Mother Brigida Kindergarten. I got a chance to express my feelings and gratitude towards the school. Just as the potter shapes the pot, your teachers are taking efforts to enhance the personality of a child.

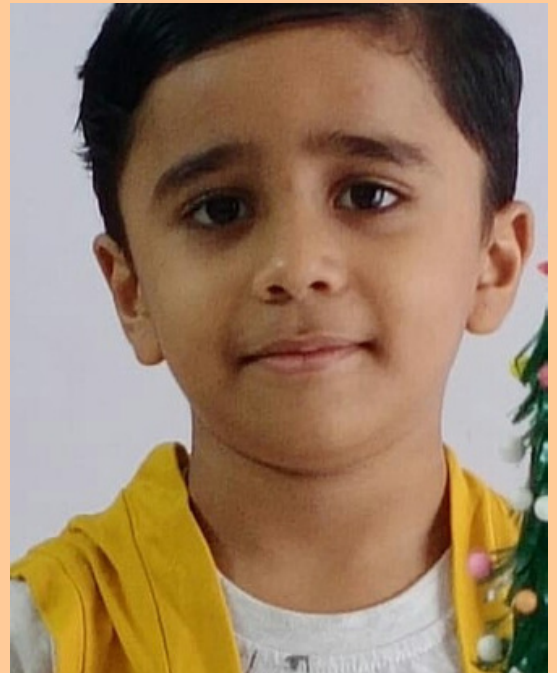

In this year, we face the COVID-19. Management of the school decided to teach the children through the videos. Teachers take a lot of efforts to make video and explain clearly the concept. This is a better option when the regular classroom teaching is not possible. Every child learns with his same age children. There are some drawbacks as friendship with other children, social skill development and familiarity with teacher etc. are looking. There is no Eye to Eye contact with the students and teacher.

Finally, I say School is school. We cannot make the environment of a school in our home. Every once in a week online classes may be a great help.

Student Name: Pranamya S. Shinkar

# MISS YOU!!!

Oh school! My school!  
Your green colour mesmerizes me;  
But I don't know when I get you to see  
Oh school, Miss you my school!

Oh school! My school!  
I miss entering the corridor;  
And always standing near the class door  
Oh school, Miss you my school!

Oh school! My school!  
I remember the motherly shout of my teacher;  
And after every mischief taking me to the sister  
Oh school, Miss you my school!

Oh school! My school!  
I wish soon the pandemic ends;  
And I get to meet my friends  
Oh school, Miss you my school!

Oh school! My school!  
After a days few;  
I will come to meet you  
Oh school! Miss you my school!

**Shantanu Avhad, LKG-D**

## RADIATING LOVE

- Love that respect life.
- Love that Respect Humans.
- Love that Respect Plants And Animals.
- In Another Ward Care for Life.
- It Also Reflects Care For Everyone.
- For Example A Mother And Her Love And Care
- For Her Child Reflecting From Her Eyes And Creating
- The Energy That Can Actually Be Sensed and Felt.
- Visualize An Actual Wave Of Energy Emanating From You.
- When you're With Your Friends and Loved Ones.
- This Radiating Love Should Be Related With The Environment For Better Health.

## ONLINE CLASSES AND VIDEOS

- The videos prepare by teachers are very nicely prepared.
- My kid Prasanna understands it very well but I felt a little bit less concentration by him.
- Online live classes such as Zoom or Google Classroom will be best for him for better understanding.
- The Syllabus should be reduced and should be taken little bit slowly for good grasping.

Hope the situation will get better soon and one to one interaction of student and teacher will be done in a classroom setting as before.

Mrs. Trupti Prasad Wani

Prasanna Wani, LKG-D

*You are my son,  
my moon, and my stars*

**Walk with me mama**

**Walk along side me mama and hold my  
littlehand.**

**I have so many things to learn That I don't yet  
understand.**

**Teach me things to keep me safe from the dangers  
everyday.**

**Show me how to do my best at home at school,  
atplay.**

**Every child needs a gentle hand to guide them  
as they grow.**

**So walk alongside me, mama We have a  
longway**

**to go love you mama.**

*Mrugal Sonawane  
Ujwala sonawane*

## RADIATING LOVE AND HOPE

A cross, heart and anchor are the icons for faith, love and hope, respectively. Hebrews 6:19 describes hope as an anchor.

The anchor and its chain secure a ship to the seabed, keeping its bow toward the wind and the waves. Therefore, ships do not anchor in deep sea but in bays where the anchor can reach the ground. Likewise, hopes anchors us to God and enable us to survive the storms of life.

Just as faith and love can be directed toward wrong things, so hope can be fixed on the wrong and become a false hope. If someone covers skin cancer with plaster in the hope it will go away, it is false hope.

Hope can be active or passive, positive or negative, biblical or worldly, realistic or unrealistic, and healing or poisoning.

We do not hope for bad things but for good things for all people – even that their enemies will come to see the light and be saved.

Although God is omniscient, omnipotent, omnipresent and infinite in love, we always should be realistic in our hope. It should be remembered that “amputated leg will not grow back; prosthesis is an option”

### Radiating Hope:

As we all know that a Sunrise starts our day and Sunset ends it. But after each and every sunset do we stop expecting another sunrise? No, Right! Similarly in the present situation of the global pandemic we all have to see a ray hope radiating from ourselves and from people around us. For example, during the lockdown when we were not allowed to play in playgrounds and with our friends but at the same time we got to spend more time with our parents and grandparents and got to know some of their childhood stories.

My father shared one such story A great Japanese warrior named Nobunaga was going to war with a fierce enemy with only one-tenth the number of men the opposition commanded. He knew that he could win the fight with a well planned strategy, but his soldiers were in doubt.

On the way the leader stopped at a Shinto shrine and told his men: “After my visit to the shrine I will toss a coin. If the head comes, we will win; if tails, we will lose. Destiny holds us in her hand.”

Nobunaga entered the shrine and offered his prayers. Then he came forth and tossed a coin in front of his men. Heads appeared. The soldiers were filled with confident and were eager to win the battle.

“No one can change the hand of destiny,” one of his attendants told him after the battle.

“Indeed not,” said Nobunaga and showed the coin which was doubled with heads on the both side.

And said we won the battle because of the radiation of hope and optimism of winning the battle.

## Experience & Opinion

We are Akshainie Mishra Parents , With this message I would like to appreciate your work. You are teaching with Great patience and love which is really appreciable. My child is taking interest in classes and trying to complete a given Assignment. I would like to thank you for Inspiring Children and conducting online classes in this pandemic.

Akshaine Mishra,LKG-D

# Love and Hope

Why do we close our eyes when we pray ,cry or dream ? Because the most beautiful things in life are not seen but felt by the heart, this feeling is called love.

Have you ever experienced it?

Love is not just for the opposite gender...but it is for every human and animal. We love our parents , our pets, the Nature and many more. The love is born from understanding.

Give your loved ones the hope that you will always continue to love them no matter what ! "Hope is a feeling of expectation and desire for a particular thing to look forward to with desire and reasonable confidence .As we love people we also expect the same love from them i.e. we hope for the same gesture from them. Love gives us the hope to Love, doesn't it?

We may not get the same love but we should never lose hope. Infinite hope gives us the confidence to grab those finite opportunities. Sometimes life can get us down, it is in these time we need to remember that there is always hope and that love is everywhere ,we only need to see it.

In the end, only three things matter .....

- 1.How much you love!
- 2.How you hope for love!
3. How gracefully you let go off things not meant for you!

"Life is very short .....

So break you silly ego

Forgive quickly,

Believe slowly,

Love truly,

Laugh loudly

And

Hope for the best."

## Online classes

1. In my opinion, online classes / videos are very well.
2. Students understand easily because the school provides these videos systematically.
3. The videos are very well organized with step-by-step teaching.
4. Because of this the students are able to learn easily
5. We are very thankful to the school for providing timely videos and that they take so much care.

Thank You!

# THE FESTIVAL OF LIGHTS – DIWALI

India is the land of festivals. It is certainly one of the biggest festival of India ., and probably the brightest festival in the world. People of different religions celebrate Diwali. Most noteworthy, the festival signifies the victory of light over darkness. This also means the triumph of good over evil and knowledge over ignorance. It is known as the festival of lights. Consequently, there are bright lights all over the whole country during Diwali.

In this pandemic Brigida Kindergarten celebrated Diwali through online session. The Online Diwali celebration was on 7th Nov 2020.

In this celebration students and the parents enjoyed the video that was made by the teachers with all the love and care . The video was about 5 important days of Diwali .

Day-1 Dhanteras

Day-2 Naraka Chaturdashi( Choti Diwali)

Day-3 Lakshmi Puja

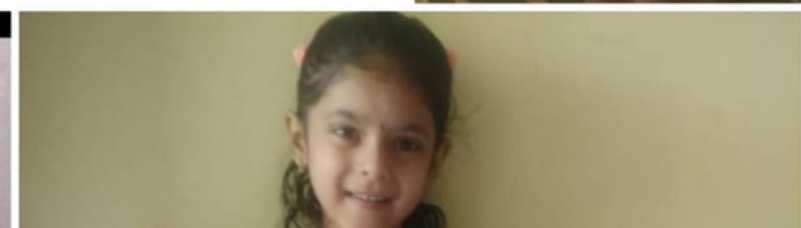

Day-4 Govardhan Puja

Day-5 BhaiDooj/ Vishwakarma Puja

After that students were all excited to show their Diwali activity to their friends through this online session . Students made lanterns and decorative diyas. Everyone was overjoyed to see the creativity of the students. After their talent was showcase they were all enthusiastic to dance all of them enjoyed dancing .

Miss. Kajal Jagtap, LKG-D

Hope is the essence of the life. Hope is what makes life move forward. Hope looks up. It is when the night is dark, that the stars shine the most. Hope looks up to God when all earthly help fails. In short, hope believes in miracles.

Hope helps us to keep the fight on and improves the chances of making our life better. Hope – the essence of life keeps our eyes wide open for an improved future.

Hope is optimism. When I am hopeful of anything, I am thinking that sorrow and difficulty of today will end soon. Hope keeps us stay positive. Let's not worry about the fact that today is a bad day. Hope keeps us telling that tomorrow will be better than this. Hope will give you the courage and inspiration to stick to your dream as long as you breathe.

Hope helps people to hold on. When life is tough and bad things happen around, it is the hope that says "Don't give up. "It is the hope that helps you to fight one more round.

Hope is a powerful antidote to the feeling of despair and desolation. Hope can sustain you during hard times and bring even more fulfilment to good times.

Arhaan Irfan Khan, LKG-E

# Virtual kite Making Competition

Makar Sankranti is celebrated every year on 14<sup>th</sup> January. The festival of Makar Sankranti is considered to be extremely auspicious. The main attraction of this festival is "Kite". In many parts of the country, kite flying competitions are held. It is symbolic in nature, because it is said that, "The higher your kite flies, The higher you go in life in terms of prosperity". To add another blooming bud to the bouquet of competitions, a virtual kite making competition was organized for the students of LKG. Students participated in the activity with full zeal and enthusiasm. It was a wonderful opportunity for the students to showcase their creativity in the ecofriendly manner. The competition was full of colours and innovative thoughts.

**By:Tr.Deepa**

## MY SCHOOL JOURNEY

My first day at School  
And I was nervous like a fool!  
Excited to make new friends  
But hoping soon the day ends!  
Taking deep breaths walking through the corridor  
Hear the feet pounding the floor!  
Finally entered the class  
Seeing my image in the window glass!  
Came the teacher in the class room  
Looking at us she was all set to groom!  
After spending months with her  
She turned out to be the best teacher!  
I made new buddies and had lots of fun  
Now waiting for the rise of sun!  
So I can go to school  
And meet my fools!  
I wish I could go in the past  
And make it longer last!  
I miss my teacher and the principal  
Because I call them my people!  
Last day of the school they bid us farewell  
And for our school we fell!  
All dressed up and tears in our eyes  
Wondering how rapidly the time flies!

HOPE EVERY MOMENT COULD BE ENJOYED AGAIN!!!

, Darshil Kottari LKG E

# THANK YOU TEACHER

You are my special teacher,  
You make me a good listener.

I like each lesson you teach,  
To dream, work and reach.

You take me to a new vision of life,  
To make me as sharp as knife.

As my role model, you set the bar high,  
But you have taught me all I can do is try.

You teach with love and do not shout,  
Teachers are best without any doubt.

By- Vihan Yogesh Patil

Love

Hope

## RADIATING LOVE AND HOPE

**Your life experience is unfolding in the precise response to the vibrations that radiate as a result of your thoughts, whether you know it is or not.**

*The above lines aptly highlight the power of our thoughts. Hence “Always radiate love, hope, positivity and happiness, because what goes out comes back.....”*

When we radiate hope and love, there is an energy that comes out from the inner self which we call as God or soul or higher being. This energy gives us the power to create and heal. It helps in healing not only ourselves but also people around us. When we transmit love and hope towards others, we also tend to get the same in return thus helping in creating joy both for us and the other person.

Although we find that the universe is aligning itself to make our wishes come true, a heart filled with love and hope makes that process faster and effortless. So how can we develop such a heart is the question?

A heart which is compassionate enough to consistently emit love and hope is a result of a feeling of thankfulness towards life. One who is always thankful towards his life and God for whatever has been bestowed on him and is constantly trying to make the best use of his blessings by trying to become better every day will be happy at heart. Only a person with a happy heart can be a source of everlasting love and hope.

Try to be such a person as the world is in desperate need of people who can lift mankind around them. Be a candle that can light the life of those around them.....

“Teaching in the Internet age means we must teach tomorrow’s skills today.”

Online learning is an instructive cycle that happens over the Internet as a type of distance schooling. Distance schooling got universal because of the COVID-19 pandemic during 2020. In light of these conditions, Online instruction and learning had a crucial part in children's training programs, despite the fact that discussions proceed on whether it is useful for small kids to be presented broadly to Information and Communication Technology (ICT).

In This Tough Situation Hats off To All Faculties and Teaching Staff who had taken an initiative to start Online Schooling, that makes easy to all student and especially for small kids to learn from anywhere & anytime. In Brigida Kindergarten School you will learn all new things with new innovative ideas and activities that make a child active, smart, and Knowledgeable.

As a Parent, I was really worried about, how the school can handle all these situations and how my daughter will also manage and learn online. But the way that handled by the school it's commendable They have made videos of each subject so the student can download and watch whenever they want and each every video was nicely made so the student can understand properly also they had one alternative for homework that was a key moment for all kids they had made pdf's for homework so the student can study daily and he/she can practice and recite each and every day.

In Brigida Kindergarten in a pandemic situation, they flawlessly celebrated each and every Indian festival/Event like Independence Day, Ganesh Festival, Teachers Day, Diwali Celebration, Christmas, and many more. They had taken the competition so the student can show their creativity, skills, and smartness

must say the Online Learning Experience was simply great it was like a normal school and Kids can easily grasp using new-age technology.

Thank You

## *Class Teacher's Desk*

My dear children, a school is not just an educational institute, but a second home to you all to get the spark of light in the right direction, always believe in yourself. You have the ability to do any kind of work whatever it is easy or tough. So be confident and work hard to perceive your dream. Be a good human being who helps everyone, be a good friend, a good soul who is honest, trustworthy and responsible. Happiness will find you, you are the person who can change the world. You have a big responsibility to make the world a better place to live in. In your life you will face many hard times but never lose hope. After heavy rain, we can see the sunshine. Always be positive. I am proud I have got the chance to teach you. You all are very brave and active. Always keep this spirit up. My true success will be seeing you in a better position. I wish you all to be a successful person in life, that will be the best gift for me. So work hard to achieve your dreams. Fill your heart with laughter and smile often, I love to see your smile, you are unique, special and an amazing person. Dream, believe, wonder, inspire, love, nurture and always listen. I wish you all good luck too.

## Virtual Christmas Celebration

Christmas is the season of love,harmony and celebration.This is a particular time to celebrate Jesus Christ's birth.People light their

homes with candles,decorations and Christmas tree.The most exciting thing about the eve is the appearance of santa claus,not only for kids but for everyone.The lighting of candles also takes place in the memory of Jesus Christ and makes his presence amoung everyone.Carols like Silent night,Rudolph,the red-nosed reindeer etc are some of the famous carols of this festival.Jesus Christ was the ultimate image of forgiveness,so people on that day visit their families,friends and relatives to celebrate together.Christmas will certainly look a lot different this year,but that's no reason to cancel the festivities.Keeping in mind a positive attitude and right enthusiasm,the tiny tots of Brigida Kindergarten actively took part in the Xmas tree decoration competition.They made Xmas tree with craft papers and many other creative things.Xmas tree was decorated to the fullest and the snap of Xmas tree with the child was sent to the respective class teachers.This added more joy and smiles to their faces.A global pandemic may be at fault for changing the tradition,but it's our responsibility to deal with it the right way.
