

KILBIL ST. JOSEPH'S HIGH SCHOOL

2020 - 2021

VISION

URISLINES OF MARY IMMACULATE **VISION OF EDUCATION**

To Facilitate the all round development of the individual through a sound spiritual ,intellectual,emotional and physical education based on Gospel values of love, truth,justice and peace to serve humanity.

MISSION STATEMENT

To equip our students with right attitudes, creative thinking, moral and ethical values, eco-consciousness, to face the challenges of life with courage and optimism and build a just society.

PRINCIPAL'S MESSAGE

Principal's Message

"As long as our ideas are expressed and thoughts kindled we can be sure of learning, as everything begins with an idea."

My dear Parents, Teachers and Students,

I was always attached to the thought **Home is the first school and School is the second home.** In fact, today it has come true. COVID 19 has altered our life including our school system, teachers, children and parents. Our homes have become school and parents have

become teachers too. Unimaginable! Invariably it is happening. It's a fact we have to live with it now whether we are rich or poor, far or near. E-learning has emerged as the best way of imparting education.

It gives me a great joy to meet you all through this e-magazine a great way to communicate and be creative. Enjoy our magazine as we move on with our lives. I thank all who contributed to this endeavour.

Be assured that the Management, teaching and non-teaching faculty of the school is working towards making this lockdown a meaningful and fruitful one. We will leave no stone unturned in educating our Kilbil family. I remain grateful to all the parents and well-wishers for your priceless support and cooperation at this moment. My sincere advice to all the students - Do not lose HOPE. Concentrate on the Silver lining amidst the thickest and darkest cloud at present times. We, at Kilbil St. Joseph's school, hope to see you all soon - refreshed and rejuvenated. Till then
SPARK A LIGHT - ILLUMINATE THE WORLD.

Sr. Flora UMI

Principal

Kilbil St. Joseph's High School, Nashik

Manager's message

Manager's Message

Dear Parents, Teachers and students,

"Good habits shape your future"

I am reminded of a little piece of wisdom from the life of Felice Leonardo "Leo Buscaglia" known as "Dr. Love". There was a strange system in his family. At the end of each day, after everybody sat around the dining table, the father would ask each one, what they had learnt from the day. So each one had to share something that they had learnt on that day and only then they could eat. So in case anyone of them in the family said, "No, today I learnt nothing", it seems the father used to say, "Let everything remain on the table, come lets go and open the encyclopaedia. Let's learn something and come back to the table and only then we shall eat." Leo used to think that he was a cursed child of a bad father who did not allow him to enjoy his dinner and rather demanded that he would have to tell him what he learnt on that day.

As life moved on, Leo became a motivational speaker and a professor in the department of Special Education at the University of Southern California. Today, when he listens to the standing ovation of lakhs of people for his excellent performance, he says, ***"But one thing has not changed; when I brush my teeth, and I come to the bed and lie down, I can still hear Papa ask me, 'Felice, what have you learnt for the day?'"*** All great people have a history of discipline and cool habits **Yes, good habits shape your future.**

Keep learning something every moment. As infants, we're presented with a strange new world to discover. And with nothing else to do, we dive in head first, devoting all our time to learning how to use our five senses. At first we appear completely hopeless, not even realizing that our arms and legs are parts of our body. But soon enough, we start figuring some things out. Within a few months, we learn how to recognize faces better than a computer can.

COVID 19 too taught us new learning. Right now, we see ourselves collectively facing this pandemic, a situation for which we had no experience and very little preparation. And, at this time when the whole world is battling against it, Kilbil St. Joseph has added another feather to its cap; the E-Magazine, to provide a platform to our students to bring out their creative thoughts and expressions.

My hearty congratulations and appreciations to the Principal and the teachers for their untiring effort in moulding the young minds and bringing Kilbil St. Joseph to its zenith. I also extend my heartfelt gratitude to all the parents for their continued support to our Institution and its endeavours. Dear parents, you have, indeed, walked an extra mile to ensure that your children make the best use of their time.

I pray that you and your children would enjoy the journey as you sail through this enchanted ocean of brilliance. I wish you all a happy and grace filled days ahead.
May God Almighty keep us safe and healthy.

Sr. Alice Antony
Manager
Kilbil St. Joseph's High School

Our Motivation !

**THANK YOU OUR LOVELY
TEACHERS FOR BEING WITH
US DURING THIS PANDEMIC .
WE MISS YOU A LOT!**

SALUTE TO OUR SUPPORT STAFF

आमच्या शाळेन खूप कर्मचारी आहेत ते बऱ्याच वर्षांपासून शाळेत आहेत. ते मुख्याध्यापकांच्या कार्यालयापासून ने शाळेचा सर्व परिसर साफ-स्वच्छ करतात.

वाचनालयात पुस्तके व इतर वस्तू व्यवस्थित मांडणी करून ठेवतात.

शाळेत येणारे पहिले ते असातात आणि शाळा सुटल्यानंतर उशिरा घरी जाणारे सुद्धा तेच असता. ते कर्तव्यदक्ष व कष्टकरी आहे. शाळा सुरू होते आणि ते सर्व व्यस्त होतात. शाळेचे सर्व कामे त्यांनाच माहिती असतात.

शालेय कामासाठी शिक्षकांना लागणाऱ्या फाईल, दफतरातील सामान, विद्यार्थ्यांसाठी नकाशे, पृथी गोल आणि इतर सामानाची माहिती त्यांनाच असते. विज्ञानासाठी च्या प्रयोगासाठीचे लागणारे सर्व साहित्य ते स्वतःच काळजीपूर्वक काढून देतात आणि नंतर ठेवतातही. ते बेल वाजवतात. मुख्याध्यापकांच्या कार्यालयातून ऑर्डर पत्र, सूचनावही घेऊन येतात. शाळेतील रांगेतल्या झाडांना पाणी सुद्धा देतात.

अशा प्रकारे आमच्या शाळेतले सर्व कर्मचारी, कर्तव्यदक्ष व आज्ञाधारक आहेत. त्यांना कधीही राग येत नाही. त्यांना सर्व कर्मचारी आवडतात. असे कर्मचारीकाका माऊशी, कर्मचारी आम्हाला खूप आवडतात.

WE ALL LOVE YOU!

FUNNIEST RIDDLES EVER...

1. WHAT WOULD A SHOE SAY TO A SHOE???

ANS = SHOOOOOE...

2. WHAT DO YOU CALL A MANGO FLAVOURED TEA???

ANS = FRUIT TEA / FROOTI

3. WHAT WOULD YOU CALL A KIT WITH BEES???

ANS = BEES KIT / BISCUIT

4. WHAT IS BANKERS FAVOURITE TV SHOW???

ANS = GAME OF LOANS

5. WHY DID POLICE CATCH MINAL???

ANS = BECAUSE SHE WAS CRI - MINAL.

6. IF WE CALLED NORMAL SUPER HEROES AVENGERS, SO THE SUPERHEROES WHO ARE TAKING REVENGE WILL BE CALLED -----???

ANS = REVENGERS

7. WHAT DO YOU CALL SINGERS WHO MAKE SONGS ON FRIENDSHIP???

ANS = FRIENDSHIP - BAND

8. WHAT DOES SOUTH - INDIAN PEOPLE SAY WHEN THEY SEE THE LEGS OF VADA PAV???

ANS = VADA PAVAAM

9. WHAT WILL SEEMA TELL HER MOM IF SHE WANTS ATTENTION FROM HER???

ANS = SEE - MA

10. WHAT WILL YOU CALL A CAKE ROAMING IN A FOREST A NIGHT???

ANS = BLACK FOREST CAKE

ARTICLE ON HOPE

- *Hope*

Actually it took much time for me to understand the TRUE meaning of the quote written above. But an incident in my life just hit me and at that point of time

I

realised the meaning of it. I had a kitten in my house. She was very cute and was very different from others. Everyday she used to play in the garden of our house. And many kittens are scared when they meet humans but I was shocked when she just came near me and was roaming near me. Then after that for one month she

kept coming. But after some time. She suddenly stopped coming and I was shocked! But I thought that she would be going somewhere else. But I didn't spot her for a week. Then I started to worry.

***In the evening,
me and my friends used to go for playing, but now I
was more interested to find where the poor kitten was. I
checked everywhere but she was not there. I searched
her for 5 days. Now, assuming that something bad may
have happened to her, I was returning home in the
evening. Just then I saw something near the tree. And,
to my surprise, she was there. I pinched myself and
YES!!!... She was there
This incident will be remembered to me my whole
life.
Some small things in life really teach us big things***

INFORMATION ABOUT HYDROPONICS

Hydroponics - A Boon to World

What is Hydroponics?

Hydroponics is a branch of hydro culture, in which plants are grown without soil by using water solvent which consists of minerals nutrient solution. Terrestrial plants may be grown with their roots only, roots are exposed to the nutritious liquid, or roots may be supported physically by a medium like gravel.

Plants are also grown through a process called photosynthesis, in which plants use sunlight and a chemical inside their leaves called chlorophyll to convert carbon dioxide and water into glucose and oxygen, as shown in reaction.

The nutrients we use in hydroponic systems may come from different sources, such as fish excrement, duck manure, or chemical fertilizers.

Currently hydroponic cultivation is gaining popularity all over the world because of efficient resources management and quality food production. Soil based agriculture is now facing various challenges such as urbanization, natural disaster, climate change, indiscriminate use of chemicals and pesticides which is depleting the land fertility

Advantages of Hydroponics

1. Plantation without soil

We can grow plants in places where the land is limited, doesn't exist, or is contaminated. In early time period, Hydroponics was successfully technique used to supply fresh vegetables for troops in Wake Island. It has been considered as the future farming to grow foods for astronauts in the space by NASA.

2. Better use of space and location

All that plants need are provided and maintained in a system; you can grow plants in a small apartment, bedrooms or kitchen as long as you have some spaces.

Roots of plants usually expand and spread out in search of food and oxygen in the soil but in case of Hydroponics, roots are sunk in a tank full of oxygenated nutrient solution and are directly in contact with vital minerals. This means that you can grow your plants closer, and consequently huge space savings.

3. Climate control

Hydroponic growers can have total control on climate, temperature, humidity, light, the composition of the air. Which means you can grow foods all year, regardless of the season. Farmers can produce foods at the right time to maximize their profits.

4. Water saving

Plants grown by the process of hydroponically can use 10% of water, as compared to one grown on the field because water is recirculated, in this method. Plants will take up water they need, while run-off water will be captured and return to the system. Water loss in this system will only occur in two forms - evaporation and leaks from the system.

5. Use of nutrients

You can have a 100% control of the nutrients (food) that plants need in this method. Before planting, growers can check what are plants requirement and what amount of nutrients needed at particular stages and at what percentage it should be mixed with water.

6. Better growth rate

Hydroponic plants grow faster than the plants which are grown in soil. This is because you can set the conditions favorable to the plants growth like temperature, light, moisture and especially nutrients. In this method plants do not waste valuable energy in search for diluted nutrients in the soil and put their complete focus on growth.

Disadvantages of Hydroponics

1. It requires your time and commitment

Plants grown in soil can be left on its own for days and weeks and plants can survive. Nature and soil will help in regulating things I something is not balancing. But in case of hydroponics, plants will die more quickly if you will not take proper care because plants are dependent for their survival.

2. Knowledge and experiences

The system which is used, will run on many types of equipments which requires expertise for the use of equipments, plants which can be grown and how they will survive and flourish in a soilless environment. Mistakes in the setting of the systems will affect plants growth and end up the whole process.

3. Water and electricity risks

In this system, water and electricity is used together. Safety precautions are mandatory.

4. System failure threats

As electricity is used, you need to keep a backup power supply. If not the plants will dry out quickly or even die.

Hope

Tomorrow will be as beautiful as today. It is the hope for tomorrow that makes us to live our present to its fullest. Everyday we get up with a dream and step ahead with the hope of fulfilling that dream. We hope to give wings to our dreams.

People have many goals in life. They try to fulfil it with their hard work and determination.

Hope means the expectations of a person. No matter we may have ups and downs in life. But we should not lose hope that tomorrow will be full of light. If we just hope it will be of no use. We have to put our hope into action to fulfil our dreams.

You should never loose hope, because you never know what tomorrow may bring. The natural flights of the human mind are not from pleasure to pleasure, but from hope to hope.

When the world says "give up" , hope whispers "Try it out once more".

Chaitanya Murthy

THINK AND DO

THINK AND DO

Think of a friend,
Whose advice is true.
Think of parents,
Who expects from you.
Think of the nation,
Which wants from you.
Don't think of people,
Who are good for nothing.
They just want you,
To be one of them.
Think of the goal,
Which you have to achieve.
Think of the destination,
Where you have to reach.

Hope

Everyone needs hope in their life. Hope makes a person live up; it gives them a source of inspiration. They don't feel upset and become very confident.

A STORY ON HOPE

Once my friend Meena got very less marks in her exam. When her parents heard this, they were very angry on her.

That evening she came to play, but she looked very upset. Then I went to her and asked her the problem. She told me everything. I encouraged her by giving hope saying, it was just one exam, I am sure you

will get good marks next exam. These words of inspiration brought smile on her face.

The next day onwards I found her giving more time to studies. And the next exam she scored high marks in all the subjects. And when we met in the evening, she was so excited that tears of joy could be seen and I guess its right about her that her result of exam was excellent.

When I told my mother about Meena and how I gave her a ray of hope. My mother was surprised about it and hugged and kissed me for the good work I did.

Sometimes, hope is all that you have, when you have nothing else. If you have it, you have everything.

CHRISTMAS CELEBRATION

This Christmas let us all...

- 1. Help the poor and the needy.**
- 2. Become Santa Claus to some needy children.**
- 3. Pray for the well-being and good health for all.**
- 4. Be grateful to the covid warriors of our nation.**
- 5. Visit an orphanage or an old age home to make them feel joyous.**
- 6. Donate xmas gifts and books to children.**
- 7. Help my parents to do household work.**
- 8. Give one meal and take care of stray animals.**
- 9. Save some pocket money.**
- 10. Pray for peace and joy on earth.**

आशेचा किरण

येईल एक नवा आशेचा
किरण ऐके दिवशी ,
तो पुन्हा उभा करेल
ऐका खचलेल्या माणसाला
त्या दिवशी.
कितीही दुःखापी राम
असो आजची ,
उद्याचा तेजस्वी
सुर्य हा घेउन येईल
हो , नवे सुख .
मदतीचा हात हा
नेहमी पुढे असावा
कारण, काळ हा
परत उत्तून येने झाला
तर लोकही आपला
हात पुढे करतील.
येईल एक नवा आशेचा
किरण ऐके दिवशी
तो पुन्हा उभा करेल ऐका
खचलेल्या माणसाला
त्या दिवशी.

ARTICLE ON HOPE

HOPE

Hope is the essence of life. Many of us could not even live a life of peace without having hope deep inside the heart. **Hope** helps us keep the fight on and improve the chances of making our life better.

Hope– the essence of life keeps our eyes wide open for an improved future. **Hope** keeps us stay positive and helps us to ignore the sufferings of the present.

Hope is a belief , a deep sense hidden in our subconscious mind. Our subconscious mind is the most powerful thing on this earth .You can make an impossible possible or win a war.

Hope is an inspiration to live life the best way we can. So make your hope strong. If you have a strong aspiration , **hope** and faith nothing can bring you down . It's very hard keeping up with the inner faith during the most critical times, but those who never leave hope, actually make it till the end.

Daksh Maniar

Class-6th B

MY HOPE

MY HOPE

We little ones really don't know what hope is...

We kids know what hope is... I want this, I want that, I want this chocolate, I want this dress, I want this pen, I want this school bag etc.

But now we know what hope is, because our schools are closed. We can't go out to play, we can't meet our friends. Now the desire or the wish of the whole world is our desire also.

The vaccine will soon be on the corona virus. Corona is very nuisance and dangerous for the whole world and this corona will be gone forever and destroy permanently. So we can go back to school, meet friends, and have fun as before.

HOPE

HOPE

.....Hold on, pain ends

Hope structures your life in anticipation of the future and influences how you feel in the present. Similar to optimism, hope creates a positive mood about an expectation, a goal, or a future situation. Such mental time travel influences your state of mind and alters your behavior in the present. The positive feeling you experience as you look ahead, imagining hopefully what might happen, what you will attain, or who you are going to be, can alter how you currently view yourself. Along with hope comes your prediction that you will be happy, and this can have behavioral consequences.

Hope shapes your methods of traversing your current situation. The cognitions associated with hope – how you think when you are hopeful – are pathways to desired goals and reflect a motivation to pursue goals. Better problem solving abilities have been found in people who are hopeful when compared with low-hope peers, and those who are hopeful have a tendency to be cognitively flexible and are able to mentally explore novel situations.

Technically, hope does not fit the criteria as an emotion. These criteria include the concept that emotions are automatic and reflexive, the cause physical and behavioral changes as a result of nervous system responses, and that they provide you with immediate information about a situation that can lead you to take actions.

Although the concept of hope does not meet the criteria, papers on the subject that have been published in reputable psychological journals have referred to it as an emotional state. Lazarus, for example, has explored the role of hope as an emotion and as a coping resource against despair. Perhaps hope is better understood as a cognition that creates a certain mood – a prolonged affective state – lacking the immediacy and intensity of reflex emotions, yet capable of determining one's outlook on life.

Having hope is to imagine a positive outcome. The directive of many motivational principles is to visualize what you want and imagine positive outcomes so that your behavior is unconsciously structured to create them. However, one does not need to turn to quantum explanations in order to account for the positive effects of hope.

Keeping hope alive in the COVID -.....19 pandemic

The COVID-19 pandemic has caused a lot of disruption in people's lives all over the world. In affected countries the government has rolled out various initiatives aimed at keeping the people safe and halting the spread of disease.

Amidst these challenges, it is important to keep our hope alive. As a prayerful nation, we should be reassured that God is still having everything in control and will see us through these difficult times, through his love and sufficient grace.

Keeping hope alive also entails playing our part to protect ourselves and the other people from getting the disease. We should strictly adhere to prevention guidelines recommended by the Ministry of Health, as well as the WHO (Such as good hygiene practices, social distancing and putting on face mask) that help to minimize COVID -19 transmission rates. These measures, no matter how inconveniencing they may appear, are key to winning the coronavirus disease fight.

It is important to stay informed about current rents or progress in the COVID – 19 fight . But this should be done in moderation so as to protect our mental health. This is because the sudden and near –constant stream of news reports about an outbreak can cause anyone to get worried.

We should keep hope because mental health problems like tensions can cause more complications than the physical state of body has got. And also Indian government has declared that vaccine of COVID – 19 is soon going to come in India so keep hope that situation will be all right after few days.

Till then stay home stay safe
